FINANCIAL INSTITUTIONS AND MARKETS · MF50004.01

Group Case Study

Prof. Jiajun Jiang · School of Economics, Fudan University · Semester 1, 2026–2027

The task

As a team, choose a specific, current problem in China's financial markets, financial institutions or financial system — for example, a problem facing a particular product, market, institution or regulation. Analyse the problem with the theory taught in this course, support your argument with data, examples and research literature, and reach a conclusion. Present your work in the last class, on Thursday 26 November.

Give the source of all data, literature and other evidence you use.

Topic

Any topic related to the course is acceptable. The list **Group Case Study — Topics** on the course page gives suggestions only: you may use one of them, change it, or choose your own.

Teams and dates

Date	What	To whom / where
By Thursday 29 October	Team roster (names and student IDs)	The teaching assistant
By Thursday 29 October	Your proposed topic, to discuss whether it is suitable	Prof. Jiang
Thursday 26 November	Presentation: 10 minutes, followed by 2 minutes of questions (12 minutes in total)	In class
On the day of your presentation	Your slides	eLearning

Each team has four to six students. The order of presentations will be decided at random.

How it is marked

- **Theory.** How well the question and the analysis use the theory of financial markets and institutions taught in the course.
- **Evidence.** Whether data, examples and literature support the argument, with their sources given.
- **Conclusion.** Whether the conclusion is clear and follows from the evidence.
- **Presentation.** Whether the presentation is clear and stays within the time limit.
